Industry Genomics Network Alliance

Making personalised healthcare accessible to all Australians by harnessing the collective skills and expertise of industry to accelerate the adoption of genomics and precision medicine

Industry Membership Brochure

November 2026

A collective voice for genomics and precision medicine

InGeNA is Australia's independent, industry-funded peak body for genomics and precision medicine. We bring together global companies and Australian innovators across diagnostics and pathology, therapeutics, genomic technologies, data, infrastructure and services.

Working with government, clinicians, researchers and consumers, we connect industry expertise with the changes needed to move innovation into routine healthcare. Our collective advocacy addresses shared barriers in testing, assessment, funding and implementation.

Why this is a critical time for Australia

The National Health Genomics Policy Framework 2026-2030 is now approved, and states are evaluating how to implement and scale genomic services. Decisions on testing, funding, assessment and data infrastructure will shape adoption and access.

Australia is investing $200 million in the Precision Health Research Program. The programme is in its planning phase and is intended to support research, innovation and clinical trials, strengthening the national genomics and precision medicine agenda.

Our advocacy in action

InGeNA has had a highly impactful year, including Professor Dame Sue Hill's Australian visit, which brought international genomics implementation experience into Australian discussions.

High engagement with members and the wider sector has brought around 800 participants into policy discussions, with 1,500 attendees across all events and activities. This highly active and engaged community connects industry expertise with shared priorities for genomics and precision medicine.

In 2025-26, InGeNA held 32 meetings with federal and state government and contributed eight policy submissions. This sustained activity helps government understand shared industry priorities and the changes needed for adoption.

All members report being satisfied or highly satisfied with InGeNA's intelligence and support.

Read our Strategic Plan or explore membership options.

What membership makes possible

Membership connects your organisation with coordinated advocacy, relevant intelligence, credibility and partnerships. Members bring their Australian priorities into shared work and gain insight into the conditions needed for innovation to reach patients.

- **Advocacy and participation:** contribute evidence to shared positions on testing, assessment, funding and implementation through our Policy and Data Working Groups, consultations and initiatives.
- **Intelligence for business decisions:** use government and stakeholder updates, briefings and member discussions to inform strategy, product planning, investment and partnerships.
- **Credibility and relationships:** connect your expertise with clinical, consumer, research and industry perspectives, and work with organisations across the genomics pathway.
- **Profile and recognition:** share achievements through member communications, events and the member directory, with opportunities to contribute expertise to the wider sector.
- **Networking and events:** regular member-only online and in-person meetings and networking events help your team connect, share experience and build relationships across the genomics pathway.

Value across the genomics pathway

- **Pharmaceutical and biotechnology companies:** connect testing access, assessment reform and funding with future therapies and pipeline priorities. Relevant work includes member submission support, genomic reporting and clinical-trial readiness.
- **Diagnostics and pathology organisations:** bring laboratory and technical experience into test funding, directories, reporting, clinical integration and sequencing workflows.
- **Digital and infrastructure companies:** contribute to interoperability, standards, data sovereignty and system design, using implementation insight to inform product and investment decisions.

How your team can take part

Monthly meetings, briefings and Policy and Data Working Groups connect members with current priorities. Work continues between meetings, and members can propose issues and co-design initiatives. Participation can span multiple initiatives, according to your priorities and expertise.

Our Consumer Advisory Group discusses submissions and government engagements so patient needs inform our responses. Member priorities lead to coordinated action, and the resulting progress and intelligence inform company strategy and the next shared priorities.

Our prospectus outlines our current work and priorities. Contact us for a copy.

Membership rights and responsibilities

- **General meetings:** receive notices, attend, speak and vote, including in elections for Elected Directors. These rights are suspended while membership fees are unpaid.
- **Board nominations:** nominate an eligible individual for an Elected Director role. The nominee must meet the Constitution's requirements and must be distinct from the organisation's nominated Representative.
- **Your Representative:** appoint an officer or senior executive, aged at least 18, by written notice to the Company Secretary to exercise membership rights.
- **Member guarantee:** if InGeNA winds up, each Member and former Member within the preceding year may be required to contribute up to $1, as set out in the Constitution.

Full rights, eligibility and responsibilities are set out in the InGeNA Constitution.

Annual membership fees

Company size	Australian revenue	Annual fee (AUD)
Start-up	$0-5 million	$500 year 1; $750 year 2; $1,000 year 3; then Band 1
Small business	Under $10 million	$1,500
Band 1	$10-75 million	$5,000
Band 2	$75-150 million	$10,000
Band 3	$150-250 million	$15,000
Band 4	$250-500 million	$20,000
Band 5	Over $500 million	$25,000

Companies in Bands 1-5 can apply for a 10% discount for a three-year commitment, with annual invoicing. Australian-owned companies in these bands are eligible for a 10% discount.

Other participation options

Associate membership is bespoke. Partnerships are non-financial relationships. Sponsorship is agreed separately for specific initiatives, reports or events. Explore the participation options.

What members value

"One of the great things about InGeNA is the personal way we get to interact, especially when responding to policy submissions, which are so important in shaping government understanding of industry needs."

Dr Natalie Thorne, CSO, Genomical

"InGeNA enables TrakGene to collaborate, create a united voice, align viewpoints and position industry in the evolving conversation and initiatives for the Australian community, helping our organisations grow."

Andrew Grant, CEO, TrakGene

"InGeNA membership helps us to keep up to date with initiatives and announcements about genomics from state & federal governments affecting the clinical and industry space, which is really useful in this highly dynamic area."

Mark Crowe, National Research Partnerships Manager, AGRF

"Being part of InGeNA provides J&J with numerous benefits such as amplifying the voice of the genomics industry in a consolidated and united manner to help shape policy and improve healthcare outcomes in Australia."

Johnson & Johnson

"When the precision medicine industry speaks with a unified voice, the Government listens; InGeNA is uniquely placed, through its broad membership, to make this happen."

Market Access Lead at a global pharma member organisation

"InGeNA is the only organisation convening leaders across medical, pathology and digital health to align priorities and deliver practical solutions for precision medicine implementation in Australia."

Government Relations Lead at a global pharma member organisation

Join the work

Bring your organisation's Australian priorities and expertise into InGeNA's work. With clinical and digital roundtables beginning in Q1 2027, members have a timely opportunity to contribute to implementation priorities.

Discuss the working groups and initiatives relevant to your team, or complete the Industry Membership Application Form. Renewing members can build on the advocacy, intelligence and relationships behind this progress.
